**Certification:** UL/C-UL 1069

### DESCRIPTION

The R4KCB12 is a code call pushbutton station providing the ability to place a code blue call to assigned console(s). Pressing the cancel button cancels the call. This station provides an output for an elapsed timer supporting a momentary or latched contact closure output. The R4KCB12 has an optional protective cover to ensure against false calls being placed if someone were to accidentally brush up against the button.

The Code Blue station is connected to its associated corridor light or domeless room controller and is continually supervised for station presence. A non-cancelable call annunciates at the associated console(s) when the station is removed from the system or a short occurs. The call will detail the location of the station (see Configuration and Installation Manual for details).

### ASSOCIATED EQUIPMENT

**CLA222 / CLA244** — Audio Corridor Lights

**CLV122 / CLV144** — Visual Corridor Lights

**DCA200 / DCA216** — Audio Domeless Room Controllers

**DCV100 / DCV116** — Visual Domeless Room Controllers

**R4KCSC** — Clear Station Cover
