**Certification:** UL/C-UL 1069

### DESCRIPTION

The R4KPB11 is an emergency pushbutton station that provides the ability to place a unique call-in priority to the assigned console(s). The presence of a Cancel button allows for cancellation at the station. This type of station is normally located at a patient room head wall for placing a call for help, staff emergency and/or code call.

The Push For Help station is connected to its associated corridor light or domeless room controller and is continually supervised for station presence. Through programming, a "Trouble" message can annunciate at the associated console(s) when the station is removed from the system.

### ASSOCIATED EQUIPMENT

CLA222 / CLA244 — Audio Corridor Lights

CLV122 / CLV144 — Visual Corridor Lights

DCA200 / DCA216 — Audio Domeless Room Controllers

DCV100 / DCV116 — Visual Domeless Room Controllers
