**Certification:** UL/C-UL 1069

### DESCRIPTION

The R4KPB44 is a status station typically used in MOB's or in areas where status notification is needed. The status station has four (4) pushbuttons that can be used in a variety of different medical environments to indicate the status of a patient/resident/situation. When activated, each button can light a corridor light and annunciate at a console or LED panel. Cancellation of each status button can be initiated by pressing the button again.

The Four Button Status Station is connected to its associated corridor light or domeless room controller and is continually supervised for station presence. Through programming, a "Trouble" message can annunciate at the associated console(s) when the station is removed from the system.

### ASSOCIATED EQUIPMENT

CLA222/ CLA244 – Audio Corridor Lights

CLV122/ CLV144 – Visual Corridor Lights

DCA200/ DCA216 – Audio Domeless Controllers

DCV100/ DCV116 – Visual Domeless Controllers
