WNC-APP
Mobile App Device Requirements

 The WNC-APP Mobile App license sends alarm data from the Wireless Call System through the facility access point (AP) network to logged in Users. Proper layout and design of your AP network is essential to the dependability and speed of your Android and iOS (Apple) devices. If you are planning to activate the option WNC-APP-V license on your Server, you will need to establish your Wi-Fi infrastructure specifically for voice communication including partitioning a bandwidth of the Wi-Fi for the server call system only and enable "Priority" for voice packets over the facility Wi-Fi.

Features

- Includes three versions: Classic, Modern 1, and
- Modern 2
- Unlimited FREE downloads for iOS and Android
- NO ongoing fees or annual licenses
- Two way voice, person to person, between caregivers with the purchase of WNC-APP-V

System Components

Model No.	Description
Server	PC Master Station
Master	PC Server Master
WNC-APP-V	Staff Voice to Voice license
