

ACCUTECH 360017

ES Controller Board | Wander Management System Control Module

Disclaimer: The images displayed on the box are only examples of the Tektone System Parts that we sell.

PRODUCT OVERVIEW

The Accutech ES Controller Board (SKU 360017) is an electronic control module used within the Accutech ES Wander Management System. It serves as the central processing component responsible for coordinating communications between resident safety transmitters, door monitoring devices, perimeter sensors, alarm indicators, and other system peripherals. The controller processes incoming system events, manages alarm logic, and distributes control signals to maintain continuous monitoring throughout healthcare and senior living facilities.

ARCHITECTS AND ENGINEERS (A&E) SPECIFICATION

System Control

- The contractor shall furnish and install the Accutech ES Controller Board as the primary processing module for the Accutech ES Wander Management System. The controller shall coordinate communications between transmitters, receivers, monitored exits, annunciation devices, and peripheral equipment while maintaining continuous system operation.

Signal Processing

- The controller shall continuously monitor resident transmitter activity and system inputs, process alarm conditions, and distribute output commands to connected security devices. The control module shall support centralized system management for healthcare and long-term care environments.

Installation

- The controller board shall be installed inside the designated controller enclosure in accordance with manufacturer installation requirements and connected to compatible Accutech ES system components.

SYSTEM COMPONENTS

The ES Controller Board operates as part of an integrated wander management system consisting of:

- ES Controller Board
- Controller enclosure
- Power supply
- Resident safety transmitters
- Door receivers and perimeter monitoring devices
- Alarm indicators
- System communication wiring
- Compatible Accutech ES peripherals

FEATURES AND BENEFITS

- Centralized processing for the Accutech ES Wander Management System.
- Coordinates communication between system transmitters and monitored devices.
- Processes alarm events in real time.
- Supports continuous monitoring of secured exits.
- Improves system response time and communication reliability.
- Designed for integration with compatible Accutech ES components.
- Intended for healthcare, memory care, assisted living, and nursing facility applications.

PRODUCT SPECIFICATION

Manufacturer	Accutech Healthcare Security Solutions
Product Name Part	ES Controller Board
Number / SKU	360017
Product Type	System Control Board
Application	Wander Management System Control
Installation	Mounted within ES controller enclosure Corrosion-
Operating Environment	Resistant Construction
Installation Environment	Mounted within ES controller enclosure
Operating Environment	Indoor
System Function	Central processing and communication management
Compatible System	Accutech ES Wander Management System

COMPLIANCE AND CERTIFICATION

At the time of research, no product-specific compliance or certification documentation has been published by Accutech for SKU 360017 ES Controller Board.

The complete ES Controller assembly (controller enclosure) is documented as UL 294 Listed (Access Control Unit); however, this certification applies to the assembled controller unit rather than the standalone controller board
