

Easy and Painless Whitening Anywhere and at Anytime!

ibright Smartphone Whitening System

The ibright Smartphone Whitening System is compatible with iPhone, Android and all USB products and powerbanks.

ibright uses advanced LED technology that connects to your smartphone or USB to whiten your teeth on the go. This easy and painless system brightens your smile with each use. Simply use the LED light for 30 minutes and repeat daily or until desired results are achieved. Included with the **ibright** Smartphone Whitening System is enough gel for up to four applications. *Refills Available.
