

ACTIVATOR™

High Performance Pre-Lotion Color Optimizing Spray

Quad Tyrosine Color Complex + Auto Darkening Technology

pH-Balancing Electrolytes prime the skin while high efficiency Color Enhancers intensify development and help to extend color longevity

DEVOTED
CREATIONS®

FEATURES:

- Pre-Lotion Color + Light Optimizing Spray
- Quad Tyrosine Amplifying Complex
- Bronze Boosting Raspberry Ketones
- Auto Darkening Complex
- Melanin Stimulating SymBronze® Green
- Light Activated Photosomes
- Skin Replenishing Electrolytes
- Hydrating Snow Mushroom
- Super Antioxidant Amla Berry
- pH Balancing Blend
- After Tan Odor Eliminators
- Formulated DHA Free
- Soft & Sheer Fragrance

BENEFITS:

- Pre-Lotion Color + Light Optimizing Spray – An advanced pre-lotion formula powered by bronzing technologies and LED light enhancers to help maximize the performance of UV, spa and sunless sessions when applied directly to bare skin.
- Quad Tyrosine Color Complex – A powerful four-part tyrosine blend designed to help accelerate the appearance of deeper, darker, more intensified tanning results.
- Auto Darkening Complex – A proprietary blend that allows tanning results to develop more rapidly and evenly for desired color perfection.
- Formulated DHA-Free – Maximum color-amplifying technology without added DHA, helping boost the appearance of deeper, darker results without relying on a DHA-based bronzing system.
- Raspberry Ketones – This natural ingredient includes Erythrulose, a ketone sugar that interacts with the amino acids in your skin, resulting in a golden-brown hue.
- SymBronze® Green – Derived from microalgae, this extract enhances skin complexion and encourages a darker tan, leaving the skin with a flawless airbrushed finish.
- Light Activated Photosomes – Used with any light therapy and helps protect the skin's immune system.
- Electrolytes – Help to improve skin's moisture barrier and strength, calm redness, and work as a vital component in maintaining proper hydration levels.
- Snow Mushroom – Hydrates the skin by helping to retain moisture, improve skin's elasticity, and create a plump, dewy complexion.
- Amla Extract – A powerhouse antioxidant rich in vitamin C that helps brighten, revitalize, and defend against dullness for a more radiant-looking complexion. This superfruit infusion supports smoother, healthier-looking skin while enhancing overall glow and vibrancy.
- pH Balancers – Helps the skin achieve optimal pH levels, leading to smoother application and more even color development.
- After Tan Odor Eliminators – Proprietary blend of deodorizing and skin freshening ingredients.

KEY SELLING STATEMENT:

This professional-grade Pre-Lotion Color + Light Optimizing Spray is engineered to prime the skin, intensify visible color development and upgrade the performance of every tanning and light-enhancing beauty session. This advanced, high-efficiency formula combines a quad-tyrosine technology, color-driving actives and an Auto-Darkening Complex to help accelerate the appearance of deeper, darker and more amplified-looking results. Raspberry Ketones and microalgae-derived bronzing technology work alongside the skin's natural amino acids to support richer, more even-looking color, while light-activated skincare helps enhance visible radiance during light-based beauty services. pH balancers and replenishing electrolytes optimize the skin's surface, creating a smoother, more receptive canvas for effortless lotion application and precise color development. The result is primed, hydrated skin and high-output color that looks deeper, smoother and more intensified. Because when performance matters, the standard gets raised.
