Certif-Eye - IFTA Filing

Innovative solutions to help simplify International Fuel Tax Association (IFTA) filing and reporting.

The Challenges

Quarterly IFTA filing can be cumbersome. Selecting an experienced partner with experience in your industry is difficult. Understanding when you need to file, and ensuring compliance as a business grows is critical. IFTA is a mandatory taxation policy for anyone operating across multiple states, including across USA borders with Mexico and Canada.

Obtaining required data is often a combination of manual processes and digital hardware that is rife with challenges. Conditions on the road, or operator error can lead to mistakes or omissions when manually completing long forms, causing compliance issues and resulting in fines or audits. Expecting operators to manually capture fuel usage or type, and odometer readings, is time consuming and imperfect, especially if drivers are switching vehicles from day to day.

The Solution

IFTA, powered by Certif-Eye® ensures for the ACCURATE and CONSISTENT capture of vehicle data, gathered in near-real-time, with long-term storage options available. Capture and track fuel usage, fuel type, and odometer readings, and combine these features with our sub-second geospatial data extrapolation, allowing for precise identification of fleet operating location, and providing all information necessary for IFTA filing requirements.

IFTA reporting varies from state to state. Depending on operation type, filing may be needed for many states simultaneously. Quarterly filing requires accurate data and information that can support each statement. Required information must document where vehicles were utilized, including fuel type, fuel usage, and odometer readings.

Partnering with 3rd Eye provides you access to industry-connected IFTA experts and the ability to assist in processing of filing requirements. 3rd Eye passively collects data and converts it into information that helps you to make better decisions faster!

Value Overview

- Reduces manual entry risks
- Simplifies IFTA filing processes
- Allows partners to connect with taxation experts
- Identifies vehicle operation hours by state
- Understand total fuel and miles driven consumed during operational hours
- Provide detailed information for backup in case of Department of Transportation (DoT) audit

Perfect For

LOGISTICS

REFUSE

TRANSPORTATION

UTILITIES
