a DOVER company

**Let drivers drive.
We'll handle the rest.**

Connected Collections™

Certif-Eye - Road Usage
Innovative solutions to help improve fleet productivity, profitability, and performance.

The Challenges

It can be difficult to identify the exact time, distance and routes that fleets have traveled to service customers. For general knowledge or Department of Transportation (DoT) compliance requirements, it's important to understand the miles, hours, and fuel quantity that vehicles utilize while working. Current methods of manually completing a Driver Vehicle Inspection Report (DVIR) are rife with potential errors. It can be dark, raining, or just an early morning that can cause a driver to make errors when manually filling in a long-form, resulting in missing or erroneous entries. Compliance and knowledge are important to understand your fleet and reduce the risk of potentially hefty fines.

The Solution

Road Usage, powered by Certif-Eye®, allows customers to KNOW their fleets' operational status'. Captured in near real-time, with only a 3rd Eye® Gateway, the Connected Collections® experience passively tracks an asset's engine hours, odometer, fuel usage, idle time, and exact location!

Certif-Eye captures key data and converts it into information that can be used to understand and determine how to best utilize a fleet. This critical information is used in various applications and processes, including DoT compliance for DVIR, driver effectiveness, and asset utilization analysis.

With 3rd Eye as a partner, detailed information is displayed in an easy-to-use dashboard, allowing fleets to make better decisions, faster. Our easy-to-use customer interface allows fleets to identify and address issues such as: drivers idling beyond expectations, vehicles operating longer than expected, route analysis predicts, excessive fuel consumption, and more!

Value Overview

- Reduce vehicle idle time
- Understand total fuel consumed during operational hours
- Identify longer than anticipated route times
- Capture driver best practices
- Improve operator best practices
- Analyze asset utilization
- Improve sustainability
