

Monitor fleet health & see maintenance issues.
Automatically open work orders and make ordering parts easier.
BEFORE ISSUES ARISE!

Let drivers drive. We'll handle the rest.

The Solution

The 3rd Eye Optim-Eyes® module is like having a personal doctor for your vehicles. Our intelligent solution constantly monitors millions of data points that are communicated throughout your chassis network. This allows us to listen to your vehicle's "heartbeat" and understand what it needs to stay healthy.

Optim-Eyes puts you in control of your vehicle's needs by allowing you to customize the types and frequency of alerts you receive. By controlling your alerting policy, you can implement new procedures and effectively address key issues. Our prescriptive maintenance options provide recommended best steps to help eliminate alerts in the future and reduce the risk of issues arising.

Partnering with maintenance solutions allows 3rd Eye to work with you to integrate automated work orders into your downstream processes. This helps you keep your maintenance information in the system you need it in most. At 3rd Eye, we strive to help you easily solve problems driving success.

With Optim-Eyes on your side, your team can feel more confident and comfortable knowing that we have their back.

3rd Eye complete fleet management solutions.
Let Your Drivers Drive, We'll Handle The Rest.

Optim-Eyes

Innovative solutions to help you reduce downtime, improve maintenance processes, and bottom lines.

The Challenges

Vehicle and asset maintenance is not an easy task. Ensuring that your fleet is in top condition and able to operate smoothly is an impressive accomplishment that deserves recognition. Unfortunately, there are avoidable issues that arise on a daily basis, causing problems for your maintenance and operations team. These issues can decrease productivity by causing vehicle breakdowns or decreasing the efficiency of your team.

Reduced productivity doesn't only lead to decreased profitability but can also tarnish your reputation with your customers. It's critical to the success of your business to ensure that your fleet is functional and ready for work. Even with the most proactive team and the best mechanics, there will always be something that slips through the cracks.

This is where 3rd Eye® digital comes in as your maintenance partner. With Optim-Eyes, we can use artificial intelligence to monitor your vehicles and alert your team to potential issues before they occur. This enables you to take action before the issue arises and prevent a small problem from becoming a major one.

Value Overview

- Minimize spares
- Reduce operational risks
- Improve maintenance cycles
- Keep the customer successful
- Optimize work order handling and execution
- Optimize parts and inventory requirements
- Standardize maintenance operating processes
