

Know exactly if, when, and where service occurred
with completely automated verification for
AUTOMATED FRONTLOADERS.

Let drivers drive. We'll handle the rest.

The Solution

The Residential AFL module, powered by Verif-Eye, allows haulers to know when service occurred, with irrefutable evidence. This intelligent system captures service passively, keeping processes streamlined, allowing you to easily determine if teams are on track for the day, and to keep up with tricky routes. With timestamped, geolocated, and customer-associated photo/video documentation, you can quickly and efficiently search for service events.

Put your customers first, utilizing Verif-Eye to understand exactly what, when, and where services occurred. With 3rd Eye as an assistant to your operations manager, your team can quickly determine if a go-back is truly required. Keep your customers satisfied as you deliver service on time, with the confirmation needed to know it happened.

3rd Eye understands refuse applications, and all solutions are specifically designed with your equipment in mind. With Verif-Eye powering your refuse fleet, you'll get best-in-class photos and/or videos from our specialty-designed property and positive service cameras that understand how to capture the best images for your consumption.

Verif-Eye ensures your operations are at the forefront, helping you keep on top of your fleet with near-real-time information that allows you to make better decisions, faster! With 3rd Eye at your side, it's quick and easy to ensure success through increased route visibility, productivity, and most importantly, customers satisfaction!

3rd Eye complete fleet management solutions.
Let Your Drivers Drive, We'll Handle The Rest.

Verif-Eye - Automated Front Loaders

Positive service verification solution, custom-designed for automated front-load garbage trucks.

The Challenges

The advent of the ingenious Curotto-Can revolutionized the residential refuse collection process, solving virtually all the challenges of utilizing a front loader for residential waste. Unlike most collection vehicles, Automated Front Loaders (AFLs) utilize forward-facing, low-to-the-ground collection, offering the unbeatable capacity, efficiency and speed of a front loader, with the flexibility of manual collection.

Despite being the most productive form of residential collection, understanding if, where, and when service occurred, and quantity of waste collected with an AFL continued to be a challenge.

3rd Eye® digital is proud to introduce the industry-changing Verif-Eye® module, specifically designed for Automated Front Loader collection. With Verif-Eye for AFLs gaining invaluable insight into your residential refuse collection operations is easy.

Value Overview

- Minimize go-backs by knowing if service was performed, or why it wasn't
- Capture every successful service completion
- Calculate total cost of collection
- Understand total quantity of waste collected
- Easily identify operator best practices
- Increase routing efficiency
- Improved sustainability
