SHEET 13  
LTPP TRAFFIC DATA  
VEHICLE WEIGHT DATA TRANSMITTAL FORM

STATE ASSIGNED ID = 355  
STATION CODE = 31  
LTPP SECTION ID = 3023

HIGHWAY ROUTE NUMBER: I80 EB MILEPOST: 316.19

FILENAME: W313023.IFH

BEGINNING DATE: July 16, 2007

ENDING DATE: See 'COMMENTS' below.

COUNT DURATION: Normally about 48 hours at portable WIM. See 'COMMENTS' below.

WEIGHT SCALE TYPE: Portable WIM

EQUIPMENT MAKE / MODEL NO.: PEEK, ADR 2000

SENSOR TYPE: Piezo Cable

VEHICLE CLASSIFICATION METHOD: 7-card FHWA 13 bin in cols 22-23

METHOD OF CALIBRATION: Static Scale

COMMENTS: This sheet has been generated by a computer program.  
Our portable WIM collection periods are normally about 48 hours.  
All available data is automatically included in one output file.  
Normally our data collection begins for all lanes at the same time.  
The filename is based upon the first date of data collected for first lane, but if data for any secondary lane began at an earlier date, the filenaming convention called for in the LTPP manual will not be adhered to. This is a compromise we needed to make at the state level in order to be able to process and submit the data using available resources.
