7/10/08		<p><b>Spangle P15</b> Hi Tom (snaza), Would you drive out to P15 to flip the Watchdog switch up, please. The site was not collecting any traffic. I did a system shut down from shop, and now it wouldn't answer. Thank you sir (HN)</p> <p>Note***: gave Hoang the good news that the phone line was repaired; gave him the bad news that the site went to default size 33,616 (no traffic monitored) after 2100 on 7/8/08. He did a system shutdown at 1030, and it wouldn't answer again, just like it does for me (Tom)</p>	HN		
7/16/08	(16:15 - 16:45)	<p><b>Spokane-P15</b> Problem: Dial, no answer after "system shut down" from shop. Found unit resting at the DOS prompt. Reset unit. Tested Watchdog okay. Had Tom called to verify contact. (HN) Note***: counter had dropped during 2000 hour on 7/8/08, went to zeros, default file size for 7/9 &amp; 7/10 before quitting. Collecting again during 1600 hour on 7/16/08 (Tom)</p>	HN
