Any contact problems :Contact@ukustudy.com Section 13, 2020 Version 4.42 1、 Improved algorithmic tuning, More sensitive and more stable.2、 For the algorithm to identify a string, increase the accuracy of this First is the best app I've seen for beginners looking to learn uke, or simply want someone who's reliable I adore the selection of available tabs, and the game only has the right amount of tools to guide you to learn songs. The main disadvantage however. That is that even if I buy a premium, I have to get out of this annoying rise for other tuners every time I open the app, even though I just want a quick song. I also finally went in and downloaded the advertised app just to see if the screen was going to go away, the news flashes, it wasn't. Another major drawback is the ongoing accident if the app, and how the star system in the end is completely damaged. It would be great to see my progress across all the tabs I practiced, but the star rating never seemed to sign up. All in all I highly recommend it, but if the aforementioned drawbacks have never been addressed I can see myself dropping it. I love the game, I pay a few bucks for it and it's really worth it. I learned the cord quickly. That was about a month ago and then it was updated and said that it had a new tab button and could teach better, cool nuts, clicking the buy button in the app. It said the purchase was confirmed - \$22 dollars. Nothing has changed, the tab is just empty white. It hasn't taken money from my account yet but I'm confused why it keeps bothering me in the app to buy what I've said already bought for nothing to change? The app is good until it gets really annoying and just keeps crashing now. Dear We are very sorry. But our test it works well, Can you give us some pictures, We can check it out more. And you can delete apps, and relocate them, You can touch the bottom of the restore. Get free pro functionality again. We hope you can send us more information, we can check it out. Thank you very much tell us the problem and sorry for that again. Email us : app@royaltuner.com . So, you might read this because you'll get this (or your developer or something). I think it's a great app! I got my ukulele because we were playing at school. It's been so out of song for the longest time. I decided to download this app and guess what, it was routed. Yes. So, that's awesome! However, there are a few things that I will change. Overall premium kinda got a way of learning how to play. I get that this is a free game, but it's a bit difficult to play sometimes. So that's one thing I'm going to change. In fact, it's the only thing I'm going to change. Premium is fine, but it may only be free of a few things. So, if you're thinking about getting this app, do it! It's a great app! If you're a forward or something, thank you for reading my review! Your app is great! Cya, what's up? Tunefor Ukulele User Basic Privacy Support App & chords for Android Screenshots Download and install tunefor Ukulele ingest & chords APK on Other Android In order to have a smooth experience, it is important to know how to use APK files or MOD Apk once you load it down on your device.
