

Running Program

After you install the program run it from the menu.

If you press the .Hide. Softkey the program will be hidden from the mobile device's screen. To return back to the application you should long-press the Menu. button on your phone and choose the icon from the task list.

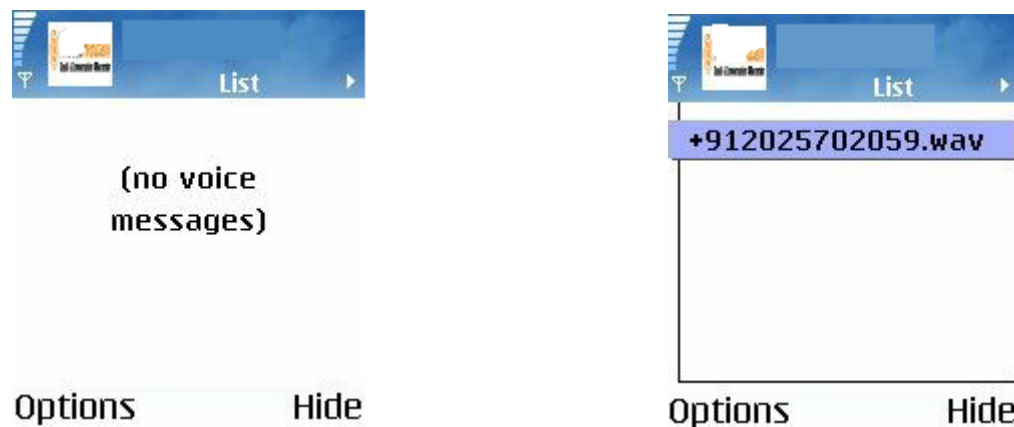

There are 3 Tab options .(By pressing right softkey to move to next tab ,and pressing left softkey to move to previous tab).

Tab1) List .Showing the list of recorded conversation

Tab 2) Settings. Displays the programs settings dialog

Tab 3) About. About the program dialog.

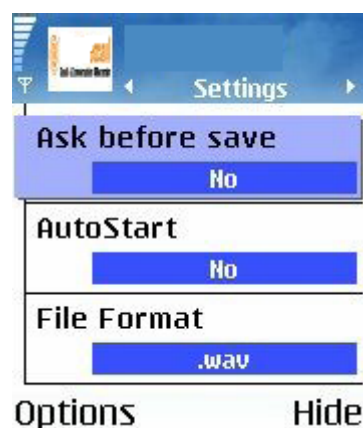

List (Tab 1): Showing the list of saved conversation.

Note: Remember if you quit the program you will not be able to Save conversations. Instead use the .Hide. Softkey, this will switch the program to the background.

Program settings (Tab 2):

When you choose the .Tab 2(pressing right soft key), the following settings dialog will appear:

You have the following parameters:

Ask Before Save [Yes/No]. If set to .Yes. Then you will be prompted with the message .Save the conversation? When the new call is established (incoming or outgoing). If it is set to .No. then conversation recording will start automatically without asking the user.

Auto Start [Yes/No]. If it is set to Yes. then Spy Call will be launched without user intervention at phone power on.

File type [AMR/WAV]. The audio file type. AMR is the default. WAV is recommended when using MMC and you need the high quality recording.

Recording conversations.

Whenever the call gets established after the call is ended it will prompt You whether you want to save the conversation, choose Yes if you want to save the conversation or No if you don't wish to save it

Program Dialog (Tab 3);

You may perform the following operations on the saved conversations clips:

- 1 Play . Play the conversation
- 2 Delete . Deletes the conversation
- 3 Mark/Unmark . Used to mark/unmark conversations
